

Brian de Vetter – Dip Phty (NZ), CKPT - CKTI

Brian gained his Diploma in Physiotherapy from Otago School of Physiotherapy in 1971. After working in Hospital settings for 17 years, he ventured into Private Practice, where he is today. He, and his wife Jenny (a Registered Nurse), became aware of Kinesio® Taping in 2006 when Dr Kenzo Kase gave a demonstration in Auckland, New Zealand. They attended KT 1-4 under the old system of training, which included a day of Lymphoedema with Ruth Coopee. In 2009 Brian and Jenny repeated KT1-2, and Brian completed KT3 and passed the online exam in December of that year.

He was invited to the Instructor's Training weekend in Singapore in February 2010, and earned his Instructors Certificate at that time.

He has an ongoing interest in utilising Kinesio® Taping to guide and correct fascial irregularities, as well as exploring using Kinesio® Tape in conjunction with the McKenzie Mechanical Diagnosis and Therapy. He has also enjoyed assisting patients with all types of other conditions utilising the Kinesio® Taping Method.

When not involved in Physiotherapy he enjoys being with his Wife, 4 children and 4 grand-children, as well as Photography, Movies, Music and going for long walks.
